

MEDIA STATEMENT

August 8, 2018

"Today, we met with representatives from several local, state and federal agencies in Jefferson County to share information about the ROCKWOOL facility in Ranson and to better understand the concerns of area residents.

We appreciate the time they spent with us to bring these concerns to our attention. We have committed to the attendees of today's meeting to answer their questions and provide in-depth information regarding the process to build and operate the facility here in Ranson.

We will continue to work closely with the greater Jefferson County community to provide information and address concerns throughout the project, including making presentations to local community groups.

We welcome members of the community to join us at our Community Open House on Saturday, August 25, from 10 a.m. to 2 p.m. at the Jefferson County Community Center in Shenandoah Junction. More information can be found at www.rockwool.com/westvirginia.

Additionally, a significant concern raised today is the potential for the Ranson facility to use petroleum coke in the manufacturing process. ROCKWOOL is committing today that we will not use petroleum coke in the Ranson facility."

Trent Ogilvie, President of ROCKWOOL North America

Those invited to the meeting today include:
